

GORDON-VAN TINE READY CUT GARAGES

You can build them Yourself

This Garage Put Up in Eight Hours

THIS series of views tells its own story. They were taken during the construction of one of our Ready-Cut garages, design No. 600. See for yourself how simple a task it is—for everything comes cut and fitted, bundled and marked; all there is left for you to do is to nail it up. You can easily do it yourself, or if you prefer to hire it done, you will find that your bill for labor is not more than half what it would be under the old method—and the whole cost of cutting which we make is more than made up for by the saving in lumber. You save at both ends by our Ready-Cut system.

On the other pages of this circular we show you a wealth of designs at all prices, and in all sizes. Every one is a handsome, strongly constructed building, made of the very best materials and all accurately cut and fitted.

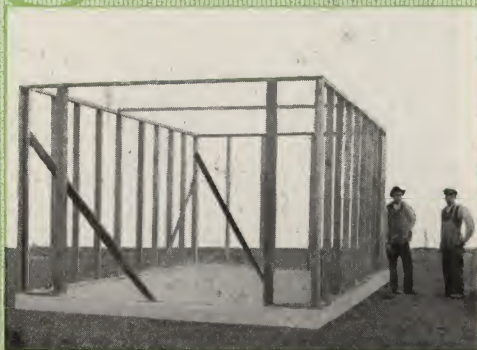

A garage, to give complete satisfaction, must be something more than a mere storage place for the car. It must harmonize with the surroundings—be a thing of some beauty, not a tin clad affair, or a woodshed in disguise. Every Gordon-Van Tine garage is thoughtfully designed, with a view as to how it will look when erected, how it will harmonize with different types of homes. You don't merely buy lumber, hardware and millwork when you buy a Gordon-Van Tine Ready-Cut garage; you buy beauty and harmony of design, real architectural service.

Such a garage individually planned and bought "uncut," from the local dealer has, in times past, cost far too much for the average man to pay, but the Gordon-Van Tine way gives you a better planned structure, all cut and fitted for less than the lumber alone used to cost. It's simply the result of direct selling in large quantities and labor saving methods and machinery, but it means big money in your pocket.

Owing to the tremendous stocks of lumber we laid in last fall, we are able to quote you these unusually low prices right at this time. However, this vast stock is rapidly being used up, and we must reserve the right to withdraw our prices at any time. Therefore, we urge you to order today. We will then hold the goods subject to your instructions, thus assuring you low prices and quick delivery. Be on the safe side. Use the order blank below.

No. 1 The material all assembled, ready for work to begin. Note how neatly everything is bundled. See how the rafter ends are beveled. Time 8 o'clock.

No. 2 Studding all erected. Every piece fits to the fraction of an inch. Time 8:30.

No. 3 Most of the siding nailed up. Note how even the ends are. Time 9:50.

No. 7 The building completed. All hardware and sash in place, and the whole painted. Completed at 5:30. Picture taken 8:00 A. M. next morning. Not a saw on the job.

No. 4 The building all sided and the rafters in place. Time 11:00.

No. 5 The roof boards all on. All roof sheathing dressed and matched, and cut to exact length. Note the smooth ends. Time 12.

No. 6 Starting to lay roofing. Time 1:20 P. M.

Ready-Cut Garage No. 600

A handsome building that would grace any home. The gable roof and exposed rafter ends give it a Craftsman appearance. Windows in each side give ample light to work by. Sizes over 10 ft. wide also have a window in the rear wall. This is one of the most popular designs ever put out. As a medium priced "home for the car" it simply can't be beaten.

Ready-Cut Garage No. 609

This is the same design as Ready-Cut Garage No. 600 shown above, in the two-car, or duplex size. There are five windows, two in each side wall and one in the rear wall, which, combined with the glazed doors, makes this a light, pleasant place to tinker up the car, even though the weather makes it necessary to keep the door closed.

Plans on this page are also suitable for Boathouses, and for design and construction, for this purpose.

Ready-Cut Garage No. 611

Notice the handy side-entrance door in this neat hip roof garage. This is a mighty convenient feature. The cornice is closed, giving the whole a neat, trim appearance. Ample light is given by the glazed doors and the windows. The front doors on this, and the other garages are of Clear White Pine, and of the finest manufacture—absolutely the best garage doors money can buy. Ten foot size has two windows. All other sizes have three windows.

12 ft.	16 ft.	121.00			

Ready-Cut Garage No. 610

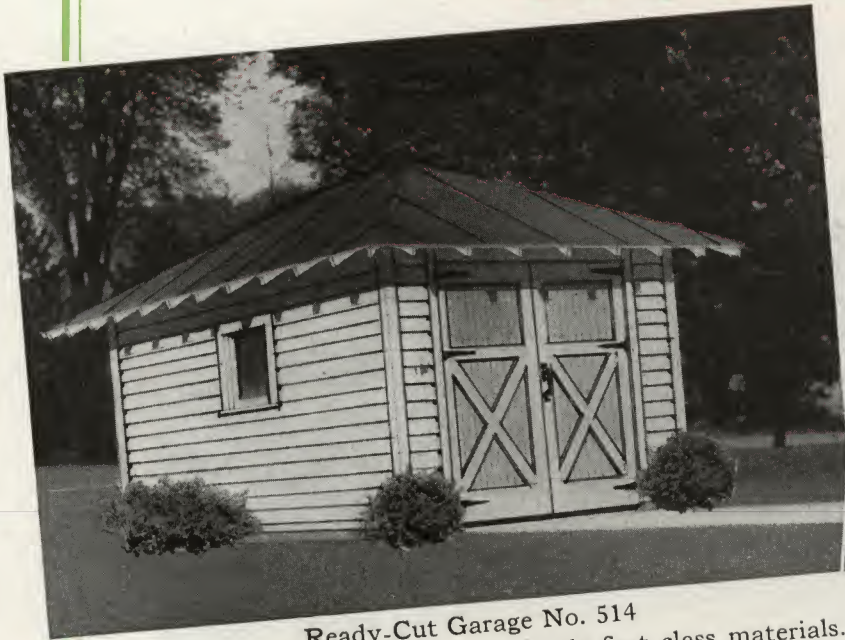

This big duplex garage is unusually handsome and finely appointed. Note the long windows, and the glazed side door. This is a design that means satisfaction to the owner, for not only is its appearance a source of pride, but it is so unusually light and handy to work in. The five pair of casement windows are all fitted with the necessary hardware.
